

MUSHAHID RAZA

Program Specialist 4 (Associate program manager) – Product Planning & Operations

mushahidraza1504@gmail.com | mushahid@uber.com

PROFESSIONAL SUMMARY

Operations, Program Management, and Product Operations professional with 5+ years of experience leading cross-functional programs, operational strategy, and customer-facing product rollouts in high-volume, data-driven environments. Proven ability to partner with Product, Engineering, and regional Operations teams to scale products, improve customer experience through data-driven insights, and deliver measurable business impact, including a +295 BPS improvement in CSAT and \$3.5M in automation-driven savings.

WORK EXPERIENCE

Associate Program Manager – Product Planning & Operations

May 2025 – Present

Program specialist 4

Uber

- Led operational strategy and continuous improvement initiatives across 6+ high-volume support domains, including Payments, Compensation, Account Management, Fraud, and Vehicle Support, driving a +295 BPS improvement in CSAT and enhancing the rider experience.
- Drove cross-functional execution with regional Operations, Product, Engineering, Policy, CX, and Safety teams to deliver scalable product rollouts, operational improvements, and enhanced customer experiences.
- Led regional operational initiatives to improve rider support, reduce customer churn, optimize driver acquisition and onboarding, and support sustainable marketplace growth through data-driven process improvements.
- Led AI-enabled automation and workflow optimization initiatives, improving operational efficiency, decision quality, customer experience, and delivering approximately \$1.07M in annual cost savings.
- Owned operational readiness for workflow and feature launches through UAT, stakeholder alignment, SOP development, launch planning, risk management, and post-launch performance monitoring.
- Developed executive dashboards and operational insights using CSAT, contact drivers, productivity, and performance metrics to prioritize initiatives and support strategic business decisions.
- Standardized operational processes, escalation frameworks, and knowledge management while supporting critical incidents, complex investigations, and cross-functional operational escalations.

Service Team lead – Bugs & Outages (Tier 2)

Aug 2023– May 2025

Uber

- Led operational response for high-impact platform incidents, partnering with Product, Engineering, Operations, and regional stakeholders to restore service, minimize customer impact, and maintain operational continuity.
- Led end-to-end incident operations, including prioritization, root cause analysis, stakeholder communication, risk assessment, and post-incident reviews across global teams.
- Managed incident backlogs based on business impact, customer experience, and operational risk, ensuring timely resolution of critical issues and effective resource allocation.
- Partnered with Product, Engineering, and Operations to prioritize recurring product issues, influence roadmap decisions, and implement scalable operational improvements.
- Delivered training, coaching, and operational readiness programs while developing SOPs, runbooks, and knowledge resources to improve response quality and execution consistency.
- Leveraged SQL and operational analytics to identify trends, measure business impact, prioritize improvements, and support product and operational strategy.
- Reported incident trends, operational performance, and business impact to leadership, influencing prioritization, cross-functional decision-making, and continuous improvement initiatives.

Uber

- Investigated and mitigated large-scale Account Takeover (ATO) fraud through data-driven analysis, identifying trends, reducing operational risk, and improving customer trust.
- Partnered with Risk, Product, Engineering, and Operations teams to enhance fraud prevention strategies, optimize workflows, and implement scalable process improvements.
- Drove policy enhancements, automation initiatives, and structured decision frameworks that improved fraud detection accuracy, operational efficiency, and investigation consistency.

KEY PROJECTS & IMPACT

- Led 15+ strategic operations programs annually, overseeing end-to-end delivery, rollout planning, governance, cross-functional stakeholder alignment, risk management, and post-launch performance monitoring.
- Led regional operational initiatives with Product, Engineering, and CX teams to improve rider support, reduce customer churn and contact abandonment, optimize driver acquisition, and strengthen marketplace performance.
- Spearheaded the Mastermind automation initiative, impacting 45,000+ customers and delivering \$3.M+ in annual savings through scalable policy automation.
- Led AI transformation across 12+ support workflows, increasing automation, reducing manual effort, improving decision consistency, and enhancing customer and agent experiences.
- Built executive dashboards tracking CSAT, SLA, AHT, Quality, productivity, and operational performance, enabling data-driven prioritization and executive decision-making.
- Partnered with Product and Engineering to prioritize defects, translate operational insights into product improvements, and reduce repeat contacts by 28%.
- Led a 35-member Customer Support team, driving a 280 BPS increase in CSAT through KPI-driven coaching, operational excellence, and continuous process optimization.
- Standardized SOPs, quality frameworks, and operational processes across 4 global support sites, improving operational readiness, compliance, and onboarding efficiency.
- Led real-time incident management and cross-functional coordination, reducing MTTR by 45% while ensuring business continuity during critical platform incidents.
- Managed 6 Team Leads and 120+ specialists, driving performance, workforce planning, talent development, and operational execution across global support operations.

EDUCATION**Bachelor of Engineering****ANITS, Visakhapatnam (2017 – 2021)**

Jun 2017 – Apr 2021

CORE SKILLS

- **Operations & Program Management**

Program Management, Product Operations, Process Improvement, Product Rollouts, UAT, Operational Readiness

- **Stakeholder Management**

Cross-functional Collaboration, Executive Communication, Strategic Planning, Change Management

- **Data & Analytics**

SQL, KPI Reporting, Root Cause Analysis, Performance Metrics, Dashboards

- **Automation & Operations**

Workflow Automation, AI Enablement, SOPs, Operational Scaling

- **Leadership**

Team Leadership, Performance Coaching, Workforce Planning

- **Tools**

Jira, Confluence, Google Workspace, Microsoft Excel, SQL, Looker, Salesforce, ServiceNow
